

Sidra Jahangir

Aspiring AI/ML Engineer

Pune, Maharashtra — sidrajahangir93@gmail.com — +91 83296 72851
sidra-portfolio.dev — linkedin.com/in/sidra-jahangir — github.com/Itz-Sidra

Professional Summary

Computer Science and Engineering(Artificial Intelligence & Machine Learning) student building end-to-end ML and NLP applications, from data pipelines to production interfaces. Skilled in Python, TensorFlow, FastAPI, Hugging Face, and modern AI frameworks.

Education

B.Tech in Computer Science(Artificial Intelligence & Machine Learning)

2024 – Present

Vishwakarma Institute of Technology, Pune

CGPA: 9.6 / 10.0

Technical Skills

Languages: Python, Java, JavaScript

AI/ML: PyTorch, MobileNetV2, Transfer Learning, XGBoost, Random Forest, Scikit-learn, SHAP/LIME, Explainable AI, Computer Vision, Tesseract OCR, Hume AI

Data: NumPy, Pandas, OpenCV, Data Cleaning & Visualization

Full-Stack: Flask, FastAPI, React.js, Next.js, Node.js, Express.js, TypeScript, REST APIs, MySQL, PostgreSQL, MongoDB

Deployment & Tools: Git, GitHub, Vercel, Render, Firebase, Postman

Professional Experience

AI Research Intern — IEEE Computational Intelligence Society (CIS), Pune Section

June 2026 – July 2026

Pune, India

- Developed machine learning models for loan approval prediction using feature engineering and model evaluation techniques.
- Compared multiple classification algorithms and contributed to a research paper for publication.
- Collaborated with researchers to improve model performance and interpretability using Explainable AI techniques.

Web Development Intern — AMDOX Technologies

November 2025 – February 2026

Pune, India

- Built and shipped web application features end-to-end, working across frontend components and backend REST APIs.
- Collaborated in an agile team on debugging and performance optimization, improving application reliability and load times.

Projects

Surface Defect Detection for Industrial Quality — [GitHub](#)

March 2026 – Present

Industry Problem Statement - Bekart — Python, TensorFlow, MobileNetV2, OpenCV, NumPy, Pandas

- Developed a computer vision system to automatically classify defective and non-defective industrial wire surface images using **MobileNetV2** with transfer learning.
- Implemented image preprocessing, augmentation, and evaluation pipelines, then built an end-to-end inference system for automated quality inspection.

Contact Builder – AI Contact Intelligence Platform — [GitHub](#)

Aug 2025 – Dec 2025

Industry Problem Statement - Passion Infotech — React.js, TypeScript, Node.js, Express.js, PostgreSQL, Gemini API, OCR

- Developed an AI-powered platform using **Gemini API**, OCR, and NLP to extract structured contact data from resumes, business cards, and images, with semantic search and confidence scoring for CRM-ready profiles

Evalvate – Multimodal AI Interview Intelligence Platform (Startup Competition Runner-Up) — [GitHub](#)

Python, FastAPI, PostgreSQL, Gemini API, Hume AI, DeepFace, MediaPipe, Next.js

- Developed a multimodal AI interview platform combining **LLMs**, **speech analysis**, and **computer vision** to evaluate candidates across technical, behavioral, and communication dimensions.
- Built scalable **FastAPI** backend integrating **Gemini API**, **Hume AI**, **DeepFace**, and **MediaPipe**, and an end-to-end **Next.js** frontend for interactive interview simulations.

Loan Approval Prediction with Explainable AI (Top 10 – MIT ADT AI Grand Challenge) — [GitHub](#)

Python, Scikit-learn, Pandas, NumPy, XGBoost, Random Forest

- Built and compared multiple ML models, including **Random Forest** and **XGBoost**, applying explainable AI techniques to interpret predictions and identify key approval factors.

Research Publications & Patents

- Loan Approval Prediction using Explainable Machine Learning Models**

Under Review

- Patent: A Machine Learning Based Prescription Scanner with Error Detection System**

Republic of South Africa — App. No. 2026/05156 — OCR, NLP, Healthcare AI, Drug Interaction Detection

- Patent: A Privacy Protection System for Personal Sensitive Information Using Local AI Redaction and Verifiable Credential (VC) Access Control** Republic of South Africa — App. No. 2025/10605 — Edge AI, Privacy, Computer Vision, Verifiable Credentials

Certifications & Achievements

- Hackathon Winner** - CSI Codezilla 2025
- Runner-Up** - LSE (London School of Economics) Generate Startup Competition (Evalvate)
- Top 10 Finalist** - MIT ADT AI Grand Challenge (Loan Approval Prediction)
- 30+ Open Source Pull Requests (13+ merged) across GSSOC, SWOC & WOC
